Specificity of Proteolysis presents a survey and conclusions on the
action of proteinases - enzymes which are cleaving proteins or
peptides. The specificity of proteinases which is determined as the
sequence of amino acids at the cleavage site of a substrate, is an
important criteria to choose an enzyme as tool in protein research.
Whenever one is looking for an enzyme to act at a defined site or to

give defined cleavage products one will find comprehensive information in this work. Comprehensive information about more than 280 endopeptidases which are based on the database LYSIS including a calculation program to determine cleavage sites, is given in the book.

The United States Institute of Peace (USIP) is an independent, nonpartisan, national institution established and funded by the U.S. Congress. The goals of the USIP are to help prevent and resolve violent international conflicts; promote post-conflict stability and development; and to increase conflict management capacity, tools, and intellectual capital worldwide. One way the USIP meets those goals is through the Jennings Randolph Program for International Peace, which awards Senior Fellowships to outstanding scholars, policymakers, journalists, and other professionals from around the world to conduct research at the USIP. The Fellowship Program began in 1987, and 253 Fellowships have been awarded through 2007. This book presents a preliminary assessment of the Fellowship Program, and recommends certain steps to improve it, including more rigorous and systematic monitoring and evaluation of the Fellowship in the future. The committee also makes several recommendations intended to help USIP gain further knowledge about the perceptions of the Fellowships in the wider expert community.

Entrepreneurship Management is a comprehensive textbook in the Indian context for management students. It is meant to familiarize students with the ground realities of starting and managing their own business. The book has recent research inputs on entrepreneurship.
