I have two 2003 Yamaha XLT's that were purchased new. Both have less than 55 hours on them and now the "power Valve" has caused piston and cylinder damage to the No. 1 cylinder. Is this a common problem with this motor and is there anyway to prevent this from happening to the second ski. Both have been maintained to the letter each year and are stored in a garage under covers.

What does it take to change the world? This book will show you how to harness the power of CASCADES to create a revolutionary movement! If you could make a change!any change you wanted!what would it be? Would it be something in your organization or your industry? Maybe something it!is in your community or throughout society as a whole? Creating true change is never easy. Most startups don!t survive. Most community

groups never get beyond small local actions. Even when a spark catches fire and protesters swarm the streets, it often seems to fizzle out almost as fast as it started. The status quo is, almost by definition, well entrenched and never gives up without a fight. In this groundbreaking book, one of today's top innovation experts delivers a guide for driving transformational change. To truly change the world or even just your little corner of it, you don't need a charismatic leader or a catchy slogan. What you need is a cascade: small groups that are loosely connected but united by a common purpose. As individual entities, these groups may seem inconsequential, but when they synchronize their collective behavior as networks, they become immensely powerful. Through the power of cascades, a company can be made anew, an industry disrupted, or even an entire society reshaped. As Satell takes us through past and present movements, he explains exactly why and how some succeed while others fail.

After only a few days at her grandparents', Katherine is already bored. Deciding to explore the woods nearby, it isn't long before the Blue Man finds her. Some items have been stolen from him, items he would very much like back. Without hesitation, Katherine agrees to find them. After all, it is a chance at magic, a chance she has looked for all her life. The Blue Man sends her to a city where puddles are much deeper and lead to very unexpected places. It is a world where towering dragons fight in the furthest reaches of the sky, where the blue ends and the darkness of the universe begins. It is a place where indoor forests hide under massive domes and are only the entryways to secret, hidden things. And when her journey becomes dangerous, she wonders why she has been given a partner who doesn't want to be there, a guide who is always looking to escape, and an assignment that is next to impossible.
