Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world. Now in its Fourth Edition, Kimmel, Weygandt, and Kieso's Financial Accounting: Tools for Business Decision Making has been tested and approved in the classroom. Whether you measure classroom success by improved grades, students who are better prepared for the Intermediate course and their future careers, or by student evaluations at the end of the semester, Financial Accounting delivers real results. "If you are teaching a debit/credit centered financial accounting principles class there is not a better written or organized text. Believe me I have looked. The supporting materials for instructors [are] also terrific." --Nancy Snow, University of Toledo "The textbook is well written with good examples and homework problems. This book is easy to understand, but is rigorous in its coverage of accounting issues." --Paul Brazina, La Salle University, Philadelphia "Best presentation of material in the industry. In addition, Financial, Managerial and Intermediate all flow together for greater coverage and comprehension." --Vince Enslein, Clinton Community College
