Academic Global Surgery. It brings together a catalogue of current knowledge, needs, and pathways to a career in the field. Academic Global Surgery involves educational, research and clinical collaborations between academic humanitarian surgeons in high-income countries (HIC), their low and middle-income country (LMIC) partners and their respective academic institutions. The goal of these collaborations is improving understanding of surgical disease, and increasing access to and capacity for surgical care in resource-poor regions. In the last few years, the rapid exchange of ideas through social media and other technologies has combined with an increasing appreciation of

worldwide health disparities to put the issue of global health at the forefront of our consciousness. Although traditionally neglected within public health initiatives, surgical disease is now recognized as a major contributor to death and disability worldwide, while surgical therapy in resource-poor areas is increasingly being shown to be cost-effective. In response to this growing recognition, what began as mission trips and short-term clinical volunteerism in the developing world has evolved into a burgeoning new field with a broader scope. While the tremendous recent interest from medical students and residents in Global Surgery has stimulated an exponential growth of interest in

this field, current surgical literature has highlighted the need for further development and delineation of this new discipline within academic surgery.

This text was developed as a book aimed at surgeons and allied health professionals that provides an introduction to the unmet needs , epidemiological, socioeconomic and even political factors that frame Global Surgery. Following upon an understanding of these issues, the text is a practical guide that enables the reader on several levels: to work cross culturally , build relationships and negotiate the logistical challenges of bringing

surgical care to low resource settings; to develop an approach to the management of various clinical conditions that would be unfamiliar to most “western” surgeons. Global Surgery is a recently coined term that encompasses many potential meanings. Most would agree that it focuses on the growing recognition of the crisis of access to quality surgical care in low resource settings. Such scenarios exist on every continent. Increasingly surgeons, allied health professionals (NGO), Public Health / Health Policy professionals as well as governmental and non-governmental organizations are engaging in this field. Many surgeons have an interest in
