The 100+ Series, Algebra II, offers in-depth practice and review for challenging middle school math topics such as factoring and polynomials; quadratic equations; and trigonometric functions. Bonus activities on each page help extend the learning and activities, making these books perfect for daily review in the classroom or at home. Common Core State Standards have raised expectations for math learning, and many students in grades 6–8 are studying more accelerated math at younger ages. The 100+ Series provides the solution with titles that include over 100 targeted practice activities for learning algebra, geometry, and other advanced math topics. It also features over 100 reproducible, subject specific, practice pages to support standards-based instruction.

The winning formula for success in algebra is practice, practice, practice! This book will help you increase your grasp of advanced algebra concepts. Numerous lessons will teach you such essential skills as transforming functions, completing the square, working with matrices, and determining probability. These lessons are accompanied by a variety of exercises to practice what you've learned, along with a complete answer key to check your work. Throughout this book you will learn terms to further your understanding of algebra, and you will expand your knowledge of the subject through dozens of sample problems and their solutions. With the lessons in this book, you will find it easier than ever to grasp concepts in advanced algebra. And with hundreds of exercises for practice, you will gain confidence using your new algebra skills in your classwork and on exams. You'll be on your way to mastering these topics and more:

- Functions
- Exponential and logarithmic equations
- Arithmetic of complex numbers
- The factor theorem
- Polynomial and rational equations
- Regression equations
- Inferential statistics
