You'll need to specify a globally unique Application Identifier. Remember the Application identifier as you'll need it later.

Provide a name to your app and click Create Application to submit. If your Identifier was unique, you now have a new, empty app on Google's servers. Open a text editor on your local computer and open the file `app.yaml` within the `customtinywebdb` folder you unzipped. Modify the first line so that the application matches the application identifier you set at Google.
