various branches of Engineering. The book uses a student-friendly approach to explain the fundamental concepts of Signals and Systems. It includes a large number of solved examples with step-by-step solutions for easier understanding of the theoretical concepts. Beginning with concepts of signals, the book moves on to other topics such as convolution and correlation of signals, CTFS, DTFS, CTFT, Sampling, Laplace Transform, and Z-Transform. Further, the subject matter is presented by illustrating the concepts first through theoretical concepts along with mathematical reasoning and then through solved examples. Solving the number of multiple choice questions and numerical exercises at the end of the chapters will help students to apply the concepts learnt in the chapters.

An in-depth look at how leaders in Asia apply the Five Practices of Exemplary Leadership in their organizations Kouzes and Posner's Five Practices of Exemplary Leadership is the most trusted and proven leadership paradigm in the business world. Making Extraordinary Things Happen in Asia focuses on the unique ways leaders in Asia have applied the Five Practices and documents their success with it. Using actual case studies and first-person experiences, the book examines the Five Practices framework, shows how the behaviors of individual leaders make a difference, and reveals what leadership in Asia looks like on a daily basis. Each of the Five Practices is supported with five or six case studies illustrating what the Practice looks like on a behavioral level. After examining the Five Practices, the book then

reveals what actions would-be and current leaders in Asia can do to improve their leadership skills and effectiveness. Customizes the legendary Five Practices of Exemplary Leadership framework specifically for Asian leaders, and a companion to The Leadership Challenge Features real case studies that show the Practices in action on a daily basis From leadership gurus James Kouzes and Barry Posner, together with one of Asia's top leadership experts, Steve DeKrey For leaders and aspiring leaders of Asian organizations and business, Making Extraordinary Things Happen in Asia is an invaluable guide to long-term leadership success.

The culmination of 34 years of ethnographic fieldwork and archival research, this book offers ground-breaking insights into fundamental principles of Huichol shamanism and ritual. The scope and length of Fikes's research, combined with the depth of his participation with four Huichol shamans, enable him to convey with empathy details of shamanic initiation, methods for diagnosis and treatment of illness, and motives for performing funeral, deer and peyote hunting, and maize-cultivating rituals.

This is the most current textbook in teaching the basic concepts of abstract algebra. The author finds that there are many students who just memorise a theorem without having the ability to apply it to a given problem. Therefore, this is a hands-on manual, where many typical algebraic problems are provided for students to be able to apply the theorems and to actually practice the methods they have learned. Each chapter begins with a statement of a major result in Group and Ring Theory, followed by problems and solutions. Contents: Tools and Major Results of Groups; Problems in Group Theory; Tools and Major Results of Ring Theory;

Bill Gates is not only the world's most successful capitalist; he's the world's biggest philanthropist. Gates has approached philanthropy the same way he revolutionized computer software: with a fierce ambition to change the rules of the game. That's why at last year's annual meeting of the World Economic Forum in Davos, Switzerland, Gates advocated a 'creative capitalism', in which big corporations should integrate doing good into their way of doing business. This controversial new idea is discussed and debated by the more than 40 contributors to this book, among them three Nobel laureates and two former U.S. cabinet secretaries. Edited by author and columnist Michael Kinsley, Creative Capitalism brings together some of the world's best minds to engage Gates's challenge. From Warren Buffet,

who seconds Gates's analysis, to Lawrence Summers, who worries about the consequences of multiple corporate objectives, the essays cover a broad spectrum of opinion. Creative Capitalism is not just a book for philanthropists. It's a book that challenges the conventional wisdom about our economic system, a roadmap for the new global economy that is emerging as capitalism adapts itself once again to a changing world.
