Cagiva Freccia 125 C12

Cagiva lagged behind the others for a while in terms of mechanical sophistication, but in May 1987 they produced a bike which stunned their rivals and captivated buyers: the 125 Freccia ('arrow' in Italian), designed by Massimo Tamburini, who worked at Binota for ten years before moving to the Castiglioni brothers' Cagiva group. The Freccia's visually striking styling would look good on any ...

Graphic Violence provides an innovative introduction to the relationship between violence and visual media, discussing how media consumers and producers can think critically about and interact with violent visual content. It comprehensively surveys predominant theories of media violence and the research supporting and challenging them, addressing issues ranging from social learning, to representations of war and terrorism, to gender and hyper-masculinity. Each chapter features original artwork presenting a story in the style of a graphic novel to demonstrate the concepts at hand. Truly unique in its approach to the subject and medium, this volume is an excellent resource for undergraduate students of communication and media theory as well as anyone interested in understanding the causes and effects of violence in media.

Physical Acoustics: Principles and Methods, Volume VI provides five chapters covering the whole of physical acoustics. The first chapter extends the methods for studying high frequency sound waves in the hypersonic range by the technique of Brillouin scattering. The next chapter discusses the acoustic properties of materials of the perovskite structure. These materials have “soft” modes, which are transverse optic modes of the phonon spectrum that have unusually low and strongly temperature dependent frequencies. This chapter expounds the influence of the soft modes, with particular attention to potassium tantalate and strontium titanate. The third chapter gives a theoretical treatment of the properties and possibilities of surface waves in crystals that are becoming of increasing interest for delay lines, amplifiers of sound waves, and other practical applications. The fourth chapter discusses the experimental methods and results of the dynamic shear properties of solvents and polystyrene solutions from 20 to 300 MHz, including a description of its materials and steady-flow properties. The final chapter deals with condensed helium, which requires quantum reactions to account for its properties. While the experimental data on solid helium are still insufficient, this chapter gives both a theoretical and an experimental account of sound propagation in solid helium, including various liquid forms. This book is recommended to both students and physicists conducting research on physical acoustics.

This short 1841 singing textbook for schools and the general public is a classic resource in music education.

The IFLA Religious Libraries in Dialogue Special Interest Group is dedicated to libraries serving as places of dialogue between cultures through a better knowledge of religions. This book based on experiences of libraries serving interreligious dialogue, presents themes like library tools serving dialogue between cultures, collections dialoguing, children and young adults dialoguing beyond borders, story telling as dialog, librarians serving interreligious dialogue.

Whereas unicast routing determines a path from one source node to one destination node, multicast routing determines a path from one source to many destinations, or from many sources to many destinations. We survey multicast routing methods for when the set of destinations is static, and for when it is dynamic. While most of the methods we review are tree based, some non-tree methods are also discussed. We survey results on the shape of multicast trees, delay constrained multicast routing, aggregation of multicast traffic, inter-domain multicast, and multicast virtual private networks. We focus on basic algorithmic principles, and mathematical models, rather than implementation level protocol details. Many historically important methods, even if not currently used, are reviewed to give perspective on the evolution of multicast routing.

Shy Olivia is determined to have fun at the Christmas party, so when she sees a drop-dead-gorgeous man, Olivia decides that this Christmas she's not going to wait meekly under the mistletoe.

Whether you're looking to hit the open road, scream down the side of a mountain, or simply take the kids out for a ride, Cycling For Dummies, UK Edition, covers all your needs. Topics include choosing the right bike and accessories, staying safe — around town and on the trails — training to improve speed and endurance, making adjustments and repairs, and much more (including answering the basic questions you may be too embarrassed to ask in your local shop). Cycling For Dummies, UK Edition is the perfect place to start when you want to take up this great sport.

50th Anniversary Edition Owls Do Cry is Janet Frame's first novel. She describes her ideas behind it in the second volume of her autobiography: "Pictures of great treasure in the midst of sadness and waste haunted me and I began to think, in fiction, of a childhood, home life, hospital life, using people known to me as a base for the main character, and inventing minor characters. For Daphne I chose a sensitive, poetic frail person, who, I hoped, would give depth to inner worlds and perhaps a clearer, at least an individual, perception of outer worlds. The other characters, similarly fictional, were used to portray aspects of my 'message' - the excessively material outlooks of 'Chicks', the confusion of Toby, the earthy make-up of Francie, and the toiling parents, the nearest characters to my own parents." This new edition is published to commemorate the fiftieth anniversary of the first publication of this novel, which has been in print ever since. Regarded by many as one of the best New Zealand novels published, it forms a loose trilogy with her two subsequent works, Faces in the Water and The Edge of the Alphabet.
