Cowspiracy Il Segreto Della Sostenibilit

Cowspiracy è considerato l'«erede spirituale di film come Fast Food Nation e Food, Inc., che hanno puntato i riflettori sul business delle industrie della carne, delle uova e dei latticini. Kip Andersen e Keegan Khun partono da una domanda molto semplice: se ogni anno la zootecnia produce più emissioni di gas serra di tutti i trasporti messi insieme, inquinando o distruggendo gli habitat, per non parlare della crudeltà che infligge a 70 miliardi di esseri senzienti, perché le principali associazioni ambientaliste di tutto il mondo (da Greenpeace a Oceana) non ne parlano? In questo libro, i due registi hanno raccolto tutto ciò che non sono riusciti a catturare con le videocamere o trascurato dal montaggio finale: le testimonianze complete dei personaggi intervistati (Lisa Agabian, di Sea Shepherd; gli scrittori Michael Pollan e Will Tuttle); dati aggiornati; tutto ciò che si nasconde dietro al business dell'«allevamento animale e dell'«industria della carne e di quella casearia; consigli per adottare uno stile di vita realmente sostenibile e per ridurre la propria impronta ecologica sul pianeta.

Jeffrey Moussaieff Masson «s groundbreaking bestseller, When Elephants Weep, was the first book since Darwin «s time to explore emotions in the animal kingdom, particularly from animals in the wild. Now, he focuses exclusively on the contained world of the farm animal, revealing startling, irrefutable evidence that barnyard creatures have feelings too, even consciousness. Weaving history, literature, anecdotes, scientific studies, and Masson «s own vivid experiences observing pigs, cows, sheep, goats, and chickens over the course of five years, this important book at last gives voice, meaning, and dignity to these gentle beasts that are bred to be milked, shorn, butchered, and eaten. Can we ever know what makes an animal happy? Many animal behaviorists say no. But Jeffrey Masson has a different view: An animal is happy if it can live according to its own nature. Farm animals suffer greatly in this regard. Chickens, for instance, like to perch in trees at night, to avoid predators and to nestle with friends. The obvious conclusion: They cannot be happy when confined twenty to a cage. From field and barn, to pen and coop, Masson bears witness to the emotions and intelligence of these remarkable farm animals, each unique with distinct qualities. Curious, intelligent, self-reliant—many will find it hard to believe that these attributes describe a pig. In fact, there is much that humans share with pigs. They dream, know their names, and can see colors. Mother cows mourn the loss of their calves when their babies are taken away to slaughter. Given a choice between food that is nutritious or lacking in minerals, sheep will select the former, balancing their diet and correcting the deficiency. Goats display quite a sense of humor, dignity, and fearlessness (Indian goats have been known to kill leopards). Chickens are naturally sociable—they will gather around a human companion and stand there serenely preening themselves or sit quietly on the ground beside someone they trust. For far too long farm animals have been denigrated and treated merely as creatures of instinct rather than as sentient beings. Shattering the abhorrent myth of the «dumb animal without feelings,» Jeffrey Masson has written a revolutionary book that is sure to stir human emotions far and wide.

A man is chosen by God to undertake a momentous mission of rescue before an apocalyptic flood destroys the world.

Fiendishly clever! Daily Mail «Complex and sinister» Observer «A literary high-wire artist» Sunday Express «Prepare for sleep deprivation!» Red All Beth has to do is drive her son to his Under-14s away match, watch him play, and bring him home. Just because she knows that her former best friend lives near the football ground, that doesn't mean she has to drive past her house and try to catch a glimpse of her. Why would Beth do that, and risk dredging up painful memories? She hasn't seen Flora Braid for twelve years. But she can't resist. She parks outside Flora's house and watches from across the road as Flora and her children, Thomas and Emily, step out of the car. Except... There's something terribly wrong. Flora looks the same, only older - just as Beth would have expected. It's the children that are the problem. Twelve years ago, Thomas and Emily Braid were five and three years old. Today, they look precisely as they did then. They are still five and three. They are Thomas and Emily without a doubt - Beth hears Flora call them by their names - but they haven't changed at all. They are no taller, no older. Why haven't they grown? There's something terribly wrong. Flora looks the same, only older - just as Beth would have expected. It's the children that are the problem. Twelve years ago, Thomas and Emily Braid were five and three years old. Today, they look precisely as they did then. They are still five and three. They are Thomas and Emily without a doubt - Beth hears Flora call them by their names - but they haven't changed at all. They are no taller, no older. Why haven't they grown? There's something terribly wrong. Flora looks the same, only older - just as Beth would have expected. It's the children that are the problem. There's something terribly wrong. Flora looks the same, only older - just as Beth would have expected. It's the children that are the problem. Twelve years ago, Thomas and Emily Braid were five and three years old. Today, they look precisely as they did then. They are still five and three. They are Thomas and Emily without a doubt - Beth hears Flora call them by their names - but they haven't changed at all. They are no taller, no older. Why haven't they grown? There's something terribly wrong. Flora looks the same, only older - just as Beth would have expected. It's the children that are the problem. Twelve years ago, Thomas and Emily Braid were five and three years old. Today, they look precisely as they did then. They are still five and three.
