Completely updated and revised to include the 2005 guidelines for cardiovascular resuscitation (CPR) and emergency cardiovascular care (ECC), CPR and AED, Fifth Edition integrates the training of CPR and AED into one simple program. This program teaches basic life support and addresses breathing and cardiac emergencies in caring for adults, children, and infants. It is also designed to facilitate the efficient training, testing, and retesting in the use of automated external defibrillators (AEDs).

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

- This is the latest practice test to pass the EMT Emergency Medical Technician Exam. - It contains 316 Questions and Answers. - All the questions are 100% valid and stable. - You can reply on this practice test to pass the exam with a good mark and in the first attempt.

This manual is developed for use within advanced first aid, CPR, and AED training courses offered through Emergency Care & Safety Institute. Based on the 2015 International Consensus Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiac Care (ECC), Advanced First Aid, CPR, and AED, Seventh Edition is ideal for use within college-level courses designed to certify individuals in first aid, CPR, and AED.

For the adapted edition, spelling follows Australian medical terminology conventions and Australian pronunciations are given. The free CD-ROM includes exercise and audio pronunciations, all of which are with an Australian accent.

Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006.

CPR and AED teaches basic life support and addresses breathing and cardiac emergencies in caring for adults, children, and infants and use of AEDs.
