They first appeared during the Triassic Period 230 million years ago and were the dominant land animals during the Jurassic and Cretaceous periods. Dinosaurs became extinct at the end of the Cretaceous together with numerous other kinds of animals such as ammonites. Included in this category are the great marine reptiles such as ichthyosaurs, plesiosaurs, mosasaurs and crocodiles and the flying reptiles known as pterosaurs.

**Dinosaurs and Other Mesozoic Reptiles of California**—

Dinosaurs Were Reptiles. If dinosaurs existed today, they would be categorized as reptiles under the subspecies Archosaurs that also include crocodiles. Unlike crocodiles and lizards whose legs extend from either side of the body, the legs of dinosaurs extend from beneath.

**Are Dinosaurs Reptiles?**—WorldAtlas

Dinosaurs are archosaurs, a larger group of reptiles that first appeared about 251 million years ago, near the start of the Triassic Period. Some other non-dinosaur reptiles are also archosaurs, including pterosaurs (the now-extinct flying reptiles) and modern crocodiles and their ancestors.

Dinosaurs and Other Prehistoric Reptiles. by. Jane Werner Watson, Rudolph F. Zallinger (Illustrator) 4.10 · Rating details · 48 ratings · 14 reviews. In this fascinating book, you will see and read about the various kinds of dinosaurs that roamed the earth millions of years ago. Here are pictures and descriptions of fifty-ton Brachiosaurus, the heaviest of all dinosaurs; huge, peach-loving Brontosaurus; long-necked Diplodocus; fearsome Gorgosaurus; armed dinosaurs such as Stegosaurus; and ...

**Dinosaurs and Other Prehistoric Reptiles by Jane Werner Watson**

While most of the fossils found in the state are those of reptiles that lived in the sea (thalatosaurs, ichthyosaurs, mosasaurs, plesiosaurs, and turtles), some are those of birds and pterosaurs that soared above it. Other fossils come from terrestrial animals that died and were washed into the ocean. These include turtles, crocodiles, lizards, and dinosaurs such as armored ankylosaurs, duck-billed hadrosaurs, and a variety of carnivorous dinosaurs.

**Dinosaurs and Other Mesozoic Reptiles of California on JSTOR**

Prehistoric reptiles Dinosaurs were not the only reptiles to walk the Earth millions of years ago. Other reptiles, large and small, roamed the land, swam in the sea, and even flew in the air while the dinosaurs were alive. Take the prehistoric reptile quiz!

**Prehistoric Reptiles** | Facts About Reptiles | DK Find Out

The resulting powerful head and firmer bite gave it the ability to eat tougher insects like beetles with hard shells, leading to species survivability and proliferation. From the Diapsida, came the dinosaurs, pterosaurs and most of today's surviving reptiles and crocodiles.

**Dinosaurs and Other Mesozoic Reptiles of California**—

Paleontologists are still piecing together details of the lives of these winged reptiles -- neither dinosaurs nor birds -- which soared above T-rex, Triceratops and other dinosaurs of the late Cretaceous period. In one of two studies published in Nature on pterosaurs, researchers in Britain found the creatures were initially ungainly fliers.
