If the freezer temperature is above 10 degrees Fahrenheit (-12C), the ice maker will not produce ice cubes efficiently. The freezer temperature should be set between 0 and 5 degrees Fahrenheit (-18 to -15C) for the ice maker to work properly. If the freezer temperature is too high, ensure that the condenser coils are clear of debris and the condenser fan is working properly.

Although Electrolux ice makers have had many problems in the past the last firmware revision has seemed to fix the large majority of the problems. This is the only ice maker on the market that has its own electronic control board. Over the past three or four years there have been up to 8 upgrade boards. If your ice maker is not working start with removing the ice bucket. With a flash light look up and see if your ice mold is orange or silver in color.

• This generally occurs when the ice maker does not get enough water. This is usually the result of a clogged water filter. Replace the water filter. Dispenser will not dispense ice. • Water supply is not connected. • Connect water supply • Ice storage bin is empty. • Ensure ice maker is turned on. When the first supply of ice is dropped into the bin, the dispenser should operate.
