An unprecedented look inside the world of baseball scouting and evaluation from two of the industry's top prospect analysts For the modern Major League team, player evaluation is a complex, multi-pronged, high-tech pursuit. But far from becoming obsolete in this environment—as Michael Lewis' Moneyball once forecast—the role of the scout in today's game has evolved and even expanded. Rather than being the antithesis of a data-driven approach, scouting now represents an essential analytical component in a team's arsenal. Future Value is a thorough dive into baseball's changing world of talent

acquisition and development, a world with its own language, methods, metrics, and madness. From rural high schools to elite amateur showcases, from the back fields of spring training to major league draft rooms, Eric Longenhagen and Kiley McDaniel break down the key systems and techniques used to assess talent. It's a process that has moved beyond the quintessential stopwatches and radar guns to include statistical models, countless measurable indicators, and a broader international reach. Practical and probing, discussing wide-ranging topics from tool grades to front office politics, this is an

human rights? Is intensive training child labour? Is competitive stress a form of child abuse? The human rights of children have been recognized in the 1989 UN Convention on the Rights of the Child, and ratified by 192 countries. Paulo David's work makes it clear, however, that too often competitive sport fails to recognize the value of respect for international child rights norms and standards. Areas of
