IBM SPSS Advanced Statistics 22 - University of Sussex

IBM SPSS Missing Values' multiple imputation procedure will help you understand patterns of "missingness" in your dataset and enable you to replace missing values with plausible estimates. It offers a fully automatic imputation mode that chooses the most suitable imputation method based on characteristics of your data, while also allowing you to customize your imputation model.

IBM SPSS Missing Values

To discard any records in IBM SPSS Modeler, you would use the "Select" node from the "Record Ops" palette. To discard any record that contains a missing value for a given field, you can set the "Mode" to "Discard" and use the condition: @NULL (field1) if the name of the field is "field1". If you have a list of fields and require all of them to have non-missing values, you can use a condition such as: count_nulls ([field1 field2 field3]) > 0 if the fields are "field1", "field2", and ...
