Consider making a 14" stub, using a 3/4"EMT conduit. Step 1. The IDEALbender indicates stubs 6" to 7". Simply subtract the take-up, or 6", from the finished stub height. In this case 14" minus 6" = 8". Step 2. Mark the conduit 8" from the end. Step 3. Line up the Arrow on the bender with the mark on the conduit and bend to 90°.

*Bender Guide - Lowe's*

1. A proper bend is made by rolling the conduit about the bender in the conduit's cradle using all foot pressure. 2. Use the correct size bender for the conduit size being bent. 3. Some over bending may be required to allow for spring back of the conduit. The resting condition of the conduit is to be at the final angle desired. 4.
