An IR remote and receiver communicate with each other by transmitting and decoding a signal in the form of pulsed IR radiation. Sent and detected signal by IR transmitter (left) and receiver (right)

Download Free Infrared Remote

(Source: SB-Projects)

Infrared radiation (IR), or infrared light, is a type of electromagnetic radiation with wavelengths ranging from 700 nm to 1 mm.

IR Remote and Receiver with Arduino Tutorial (4 Examples)

The dominant remote-

Download Free Infrared Remote

Control technology in home-theater applications is infrared (IR). Infrared light is also known as plain-old "heat." The basic premise at work in an IR remote control is the use of light to carry signals between a remote control and the device it's directing.
