Markings is distinctive, as W.H. Auden remarks in his foreword, as a record of "the attempt by a professional man of action to unite in one life the *via activa* and the *via contemplativa*." It reflects its author's efforts to live his creed, his belief that all men are equally the children of God and that faith and love require of him a life of selfless service to others. For Hammarskjöld, "the ...

Taxiways and any other non-runway surfaces are painted with yellow markings, while only runway surfaces are marked in white. To get to the runway, crews move along the assigned taxiways, following the yellow center stripe and all ground control instructions and taxiway signs until they reach the hold line at the assigned runway.

Everyone is familiar with the iconic WWII Jeep, its green paintwork annotated with white letters, numbers and symbols. Unintelligible to the casual observer, these markings were integral to the organization of the U.S. Army on the move in 1944. This uniquely detailed guide covers all the markings used on American tanks and tracked vehicles, lorries and jeeps to denote their unit and classification, plus tactical markings and the debarkation codes used in the Normandy landings. Hundreds of contemporary photographs are paired with precise color

diagrams to show exactly how markings appeared on vehicles, including the exact measurements, and explain all the different variations in use. A final chapter covers the variations of camouflage used on vehicles. The perfect reference book for modelers, collectors, and restorers of historic vehicles, and a fascinating guide to anyone wanting to use WWII photographs to aid their research.

Now in its fifth edition, this reliable resource continues to be a practical guide to identification and palpation of significant anatomical landmarks and structures. With a combination of clear text, drawings and photographs it helps the student to acquire knowledge of structures and movements palpable below the surface and to develop their tactile skills. The new edition now incorporates educational aids such as full colour photographs and drawings along with access to an online resource of 100s of self-assessment questions which gives the student the opportunity to check their knowledge and receive feedback. Introductory chapter on the principles and practice of palpation vital to background study Step-by-step guide to identification and palpation of structures Facilitates learning by providing a clear and concise approach Offers basic information on accessory movements

A collection of 25 improvisational quilts, this compilation from one of the premier colorists in contemporary American art represents work from three distinct series of quilts, all of which are photographed in sensational colors and with extensive detail. The quilts in the first series, Constructions, are large complex pieces created from hundreds of strips of fabrics. The next, Markings, is a series of nine quilts in which the artist explores calligraphy. In the final series, Structures, the artist repeatedly places silk-screened images directly onto cloth, creating blocks of color. Featuring the works-in-progress alongside the finished artwork, this showcase provides fascinating insight into the artistic process.

ÒTen thousand years of history, and we find the remains of ancestors removed from their burial mound . . . Ò Impressions of the past, markings on earth, are part of the world of KARENNE WOOD. A member of the Monacan tribe of Virginia, she writes with insight and grace on topics that both reflect and extend her Native heritage. *Markings on Earth* is a cyclical work that explores the many dimensions of human experience, from our interaction with the environment to personal relationships. In these pages we relive the arrival of John Smith in America and visit the burial mounds of the Monacan people, experience the flight of the great blue heron and witness the dance of the spider. We also share the personal journey of one individual who seeks to overcome her sense of alienation from her people and her past. Wood's palette is not only Nature but human nature as well. She writes pointedly about shameful episodes of American history, such as the devastation of Appalachia by mining companies and the "disappearance" of Indian peoples. She also addresses forms of everyday violence known to many of us, such as alcoholism and sexual abuse. Wood conveys an acceptance of history and personal trauma, but she finds redemption in a return to tradition and a perception of the world's natural grace. Through these elegantly crafted words, we come to know that Native writers need not be limited to categorical roles determined by their heritage. *Markings on Earth* displays a fidelity to human experience, evoking that experience through poems honed to perfection. It is an affirmation of survival, a work that suggests one person's life cannot be separated from the larger story of its community, its rootedness in history, and its timeless connections to the world.

Explains the meaning given by diverse cultures in various eras to animals, plants, patterns, man-made objects, and abstract forms.

"TRB's National Cooperative Highway Research Program (NCHRP) Report 759: Effective Removal of Pavement Markings aids in the selection of safe, cost-effective, and environmentally acceptable practices for the removal of work zone and permanent pavement markings. The practices highlighted in this report emphasize minimal damage to the underlying pavement or visible character of the surface course."
-- Publisher's description

In the aftermath of World War II, the Continental Air Command was redesignated as the Strategic Air Command (SAC) as part of a plan to organize the Army Air Forces around three new organizations based on strategic, tactical and air defense missions. Nearly everything about the SAC was secretive--its capabilities, strengths, order of battle and unit identities. Its aircraft were rarely photographed and those images that were captured revealed little information. This book comprehensively documents SAC tactical aircraft markings from the organization's inception in 1946 to the end of the tail-marking era in April 1953, a period when the marking schemes included large tail markings, vivid squadron identification markings and attractive, colorful unit insignia. The SAC's history is described along with the evolution of its aircraft markings policy and basic definitions of markings terminology. There are individual unit sections on SAC's bombardment, strategic reconnaissance and fighter groups and wings. The text is heavily illustrated and features many never before seen photographs of SAC aircraft in full war paint.

This study evaluated the night visibility of waffle tape and paint with large beads, particularly during wet night conditions. Data were collected at two sites along a primary arterial. The evaluation included an examination of (1) the application of the markings, (2) the visibility of the markings using retroreflectometer measurements and subjective assessments, and (3) the costeffectiveness of the markings. The study revealed: (1) compared with paint with standard beads, the waffle tape and paint with large beads were slightly more retroreflective during light rain at night and recovered quicker after flooding out, (2) the marginal improvement in visibility during periods of light rain do not offset the operational problems of applying paint with large beads, and (3) the benefits of waffle tape during light rain do not appear to justify its use solely for wet night visibility. Because of the above findings, snowplowable raised pavement markers, which are very visible in wet night conditions, appear to be more cost-effective. The study recommends that (1) VDOT continue to use and maintain snowplowable raised pavement markers for visibility during wet night conditions, (2) VDOT continue to monitor FHWA's study on all weather pavement markings, and (3) the Suffolk District consider testing nonsnowplowable raised pavement markers to assess their use as a low-cost alternative to improve visibility during wet night conditions where snowplowing occurs infrequently.
