The Canter nameplate was first introduced in March 1963 for the existing T720 range of light-duty trucks. Most models of the truck are distinguishable by a front ‘Canter’ badge, but the common Mitsubishi badge is usually used on the rear. In late 2005, a new Canter was presented, with safety being the main issue.

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Franklin, Jack, Marla, Thaduis, and Caitlin... this unlikely group of assorted misfits are the Cermetarians, a group that will take on any job - no, really, we mean any bloody job (money’s a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee’s granddaughter, and a reluctant furry monster straight from under your little sister’s bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Analyses all aspects of foreign direct investment (FDI) made by Japan’s multinational corporations (MNCs) in Asia, the EU and the USA. Perspectives are offered to explain the changing characteristics of Japan’s FDI practices and these are supported by data compiled from government and MNC sources.

Drawing on numerous Japanese and non-Japanese primary and secondary sources, this highly informative book analyzes all aspects (both domestic and international) of foreign direct investment made by Japan’s multinational corporations in Asia, the European Union, and the U.S. It covers the critical period from 1970 -- the point at which Japan’s economy reached a level of global importance -- through 1998 -- the nadir of Japan’s economic woes. The book offers numerous perspectives to explain the changing characteristics of Japan’s FDI practices over the period. The text is well supported by some 50 figures and data tables compiled from both Japanese government ministries and multinational corporations.

A research bulletin examining the Japanese automotive industry’s impact worldwids.

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles’ fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars, is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.
