MORI SEIKI - MV 40 A

The early Mori's had 2 types of tool
changers, the MV Junior and MV 40

Download Free Mori Seiki Mv 40

had a small AC motor that drove the ATC (this is the one with the main arm held on the shaft with locking rings and once the screws were loose, you did need to "shock" the main arm loose from the shaft), the MV35, MV45, etc. had a hydraulically driven ATC, NO MOTOR OF ANY KIND. and the main arm is "splined" to the shaft (no adjustment there).
