This book celebrates established icons, newly discovered gems and contemporary masterworks that represent the highest expression of Scandinavian design and response to their environment. Fifty projects are featured in detail, ordered according to the way in which different light conditions have imparted particular qualities on the buildings. Henry Plummer treats his subject from a uniquely authoritative perspective in which his words resonate directly with his artfully taken images. Books that give a true sense of the magical light that have shaped great buildings are rare: this is a publication to savour.

This book contains new photographs of some of the most significant Scandinavian private houses from the 1930s to the present day. The houses featured vary greatly in plan, materials and construction, but are all strikingly modern. Nordic architecture is highly distinctive, characterised by a sensitivity to the tonal qualities of light, in particular the conscious use of light as the most important form-producing and space-defining element. This selection of fourteen of the most beautiful houses in Scandinavia showcases the best in Nordic architecture and the spirit of Nordic light.

Nordic Classicism presents the first English-language survey of an important yet short-lived movement in modern architectural history. It was through the Nordic classical movement that Scandinavian architecture first attracted international attention. It was the Nordic Pavilions, rather than Le Corbusier's modernism, which generated most admiration at the 1925 World Fair, and it was the Nordic classical architects – including Gunnar Asplund, Sigurd Lewerentz, and Alvar Aalto – who went on to establish Scandinavia's reputation for modern design. Yet this brief classical movement was quickly eclipsed by the rise of international modernism, and has often been overlooked in architectural studies. The book explores the lives and works of various key contributors to Nordic classicism – with eleven chapters each focussing on a different architect and on one of the period's outstanding works (including the Stockholm Central Library, the Resurrection Chapel, and the Woodland Cemetery). Famous architects and their works are examined alongside many lesser-known examples, to provide a comprehensive and in-depth account. As we approach the centenary of many of the events to which the book refers, now is a timely opportunity to explore the key themes of the Nordic classical movement, its architects, their buildings and the social and cultural changes to which they were responding.

Organic Design in Twentieth-Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints. The book focuses on the works and writings of architects in Nordic countries, such as Sigurd Lewerentz, Jørn Utzon, Sverre Fehn and the Aaltos (Aino, Elissa and Alvar), among others. It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another. Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer, architectural brief and building-as-process. With over 140 black and white images, this book is an intriguing read for architecture students and professionals alike.

Recognized internationally for its sensitivity and responsiveness to place and locale, and its thoughtful use of materials and refined detailing, Nordic architecture continues to evolve and explore its modernist roots. This new book covers the romantic and classical architectural foundations of Nordic modernism, the development of Nordic Functionalism, the maturing and expansion of Nordic modern architecture in the post-war period, international influences on Scandinavian modernism at the end of the 20th century, and, finally, the global and local currents found in contemporary Nordic architecture.

Overflowing with stunning photography, this collection discovers the best contemporary houses across Scandinavia's most beautiful and remote locations, designed by both emerging and established architects.

In Scandinavian Modern, Magnus Englund and Christina Schmidt of design store Skandium trace the development of the Scandinavian style, introduce key designers and take a look at some of the most stylish homes in Scandinavia. The first section, Elements, takes a lively look at Scandinavian designers and design in the context of materials: wood, glass, textiles, ceramics, and so on. The second section, Living, offers an in-depth visual survey of 12 outstanding homes in Denmark, Sweden, and Finland, ranging from modern country homes to sophisticated city-center apartments. The accompanying text provides a fascinating insight into each interior, describing its design, planning, and evolution.
