Creating an OAuth 2.0 provider API. Configuring the API Security Scheme. Acquiring Access Tokens for Individual Schemes. Using the Access Token. In OAuth 2.0, the following three parties are involved: The user, who possesses data that is accessed through the API and wants to allow the application to access it.

Tutorial: Securing an API by using OAuth 2.0

But OAuth 2.0 can't secure APIs on its own. It needs to be implemented alongside other tools like an API gateway—which acts as a firewall to protect the API from malicious requests and data—as well as a comprehensive access management tool. Okta's API Access Management system has standard-compliant support for OAuth 2.0.

Want to Secure Your APIs? You'll Need OAuth 2.0 for That ...

Browse to your API Management instance, and go to APIs. Select the API you want to protect. For example, Echo API. Go to Settings. Under Security, choose OAuth 2.0, and select the OAuth 2.0 server you configured earlier. Select Save.

Protect API backend in API Management using OAuth 2.0 and ...

Authorize access to APIs by using OAuth 2.0 schemes in IBM API Connect. Build, test, and leverage technological solutions to combat systemic racism Get involved Close outline

Secure APIs by using OAuth 2.0 schemes in IBM API Connect
