## Pharmacodynamics Amp

pharmacokinetics (what the body does to a drug, or the fate of a drug within the body), helps explain the relationship between the dose and response, ie, the drug's effects. The pharmacologic response depends on the drug binding to its target. The concentration of the drug at the receptor site influences the drug's

## Pharmacodynamics Amp

Pharmacokinetics is the study of what the body does to the drug. Pharmacodynamics is the study of what the drug does to the body. It's common during Phase I and II testing to collect blood samples at several time points before and after dosing and analyze them to determine the plasma levels of the drug at those times.
