In Translation and Cross-Cultural Communication Studies in the Asia Pacific, Leong Ko and Ping Chen provide a comprehensive and in-depth account of various issues encountered in translation and interpreting activities and cross-cultural communication in the Asia Pacific.

This edited volume addresses the dynamic global contexts redefining Asia Pacific higher education, including cross-border education, capacity and national birthrate profiles, pressures created within ranking/status systems, and complex shifts in the meanings of the public good that influence public education in an increasingly privatized world.

Up to date with the fourth edition of PMI ' s Program Management Standard, PgMP® Practice Test Questions: 1000+ Practice Exam Questions for the PgMP® Examination contains more than 1,000 practice questions to help readers hone their knowledge and test their skills. It covers all five of the program management domains: Strategic Program Management, Program Management Life Cycle, Benefits Management, Stakeholder Management, and Governance. It also examines all of the sub domains of the lifecycle domain. With an easy-to-use format, this is an ideal resource for those preparing to take the PgMP® exam.

Concise Australian Commercial Law, now in its fifth edition, has two basic objectives: to provide students with a general understanding of the legal environment of business and to expose them to the language and perspectives of legal professionals, regulators and other commercial actors; and to provide a reference point for non-law students studying key commercial law topics - the law of contract, torts, consumer protection, agency, business organisations and business ethics - in a way that is clear, accessible and challenging for a non-law student. The authors have selected cases that should be of interest to non-law students and every effort has been made to ensure that the case extracts contain sufficient information to enable students to discuss and debate the decisions that a court has reached and

Download Free Rmit Exam Paper

appreciate how the principles could be applied in a commercial environment. Similarly the relevant legislation is discussed in a way that is designed to promote understanding of the law and the policy considerations behind the legislation. The fifth edition been updated to incorporate the many legislative changes and case law developments since the last edition. These updates include: a revised introduction (including a guide on how to approach the study of commercial law); a number of new contract law cases and an expanded section on online contracting; amendments to the Australian Consumer Law as well as a number of interesting new cases concerning consumer protection; case law developments in relation to the standard of care and causation in negligence; the recent 'safe harbour' amendments to the Corporations Act and a number of new cases dealing with directors' duties: and revisions to the chapter on Business Ethics to include references to the Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry (the Banking Royal Commission). To ensure the text is a more complete teaching and learning package, there is a revised set of activities at the end of each chapter that have been written with the non-law student in mind and can readily be used in a student-centred group work environment.

This textbook is intended to give an introduction to neuroscience for students and researchers with no biomedical background. Primarily written for psychologists, this volume is a digest giving a rapid but solid overview for people who want to inform themselves about the core fields and core concepts in neuroscience but don't need so many anatomical or biochemical details given in "classical" textbooks for future doctors or biologists. It does not require any previous knowledge in basic science, such as physics or chemistry. On the other hand, it contains chapters that do go beyond the issues dealt with in most neuroscience textbooks: One chapter about mathematical modelling in neuroscience and another about "tools of neuroscience" explaining important methods. The book is divided in two parts. The first part presents core concepts in neuroscience: Electrical Signals in the Nervous System Basics of Neuropharmacology Neurotransmitters The second part presents an overview of the neuroscience fields of special interest for psychology: Clinical Neuropharmacology Inputs, Outputs and Multisensory Processing Neural Plasticity in Humans Mathematical Modeling in Neuroscience Subjective Experience and its Neural Basis The last chapter, "Tools of Neuroscience" presents important methodological approaches in neuroscience with a special focus on brain imaging. Neuroscience for Psychologists aims to fill a gap in the teaching literature by providing an introductory text for psychology students that can also be used in other social sciences courses, as well as a complement in courses of neurophysiology, neuropharmacology or similar in careers outside as well as inside biological or medical fields. Students of data sciences, chemistry and physics as well as engineering interested in neuroscience will also profit from the text.

This highly respected and valued textbook has been the book of choice for Cambridge IGCSE students since its publication. This new edition, complete with CD-ROM, continues to provide comprehensive, up-to-date coverage of the core and extended curriculum specified in the IGCSE Physics syllabus, The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.
