Seminar paper from the year 2020 in the subject Literature - Africa, language: English, abstract: This study aims at carrying out a stylistic analysis of selected short stories from Achebe's Girls at War and other stories. Stylistics, a combination of style and literature is a discipline which has been approached in different ways by different scholars both in linguistic studies and literary studies; it is a borderline discipline between linguistics and literature thus its definition varies based on the theory adopted. For better understanding, there is the need to explain what style is before defining the term stylistics. Style is got from the Latin word "Stilus" which means "a pointed instrument for writing on waxed tablets and has, in modern times, been associated with a way or manner of writing or speaking" (Otagburuagu et al 35). Style has also been defined as the description and analysis of the variability forms of linguistic items in actual language use. It is the manner or mode of expressing one's thought in language. A creative artist expresses his feeling, thought, ideas and vision through language and his unique way of using language to convey his feelings is what is called style (E.J. Otagburuagu et al 2014:35). Leech and Michael in E.J. Otagburuagu et al 2014 define style as "the linguistic characteristics of a particular text". According to Otagburuagu et al, Katie in her book, A Dictionary of Stylistics (1989) classifies style into the following: style as personal idiosyncrasy, style as a technique of expression and style as the highest achievement of literature. Stylistics has been defined as a study of the different styles that are present in either a given utterance or a written text or document. Stylistics is derived from the word style and it concerns itself with the study of the techniques and manner in which people express their thought both in speech and writing. Stylistics deals with a wide range of language varieties and styles that are possible in creating different texts, whether spoken or written, monologue or dialogue, formal or informal, scientific or religious etc. Stylistics unlike pragmatics that focuses on the "what" of a text, concerns itself with the "how" and "why" of a text. Leech, in line with this, defined stylistics as "a

linguistic approach to literature; explaining the relation between language and artistic functions with motivating questions such as why and how more than what. ”

Seminar paper from the year 2007 in the subject English Language and Literature Studies - Linguistics, grade: 1,7, University of Trier (Anglistik), course: Literary Linguistics, language: English, abstract: In 1903 James Joyce wrote the novel *Dubliners*, which consists of short stories about selected Irish people portraying their lives in Dublin. "Eveline" is one of the short stories of adolescence in this collection, as it deals with a young nineteen year old woman named Eveline, who is confronted with the decision on whether she should leave Dublin with her boyfriend Frank and start a new life in Buenos Aires or stay in her old habits. The story is written from a third-person limited point of view and because of this the reader is able to perceive Eveline's world through her perspective. The reader witnesses how Eveline tries to discover herself and her own wishes. But her way of initiation is meant to lead to an surprising conclusion by Eveline in the end. What is so fascinating about "Eveline" is not only the plot itself, but the way Joyce illustrates the situation of Eveline linguistically through his way of writing. Through various linguistic means Joyce pictures Eveline's "fear of taking a chance, fear of the unknown and of change."

Stylistics has become the most common name for a discipline which at various times has been termed 'literary linguistics', 'rhetoric', 'poetics', 'literary philology' and 'close textual reading'. This Handbook is the definitive account of the field, drawing on linguistics and related subject areas such as psychology, sociology, anthropology, educational pedagogy, computational methods, literary criticism and critical theory. Placing stylistics in its intellectual and international context, each chapter includes a detailed illustrative example and case study of stylistic practice, with arguments and methods open to examination, replication and constructive critical discussion. As an accessible guide to the theory and practice of stylistics, it will equip the reader with a clear understanding of the ethos and principles of the discipline, as well as with the capacity and confidence to engage in stylistic analysis.

Exploring the Language of Drama introduces students to the stylistic analysis of drama. Written in an engaging and accessible style, the contributors use techniques of language analysis, particularly from discourse analysis, cognitive linguistics and pragmatics, to explore the language of plays. The contributors demonstrate the validity of analysing the text of a play, as opposed to focusing on performance. Divided into four broad, yet interconnecting groups, the chapters: \* open up some of the basic mechanisms of conversation and show how they are used in dramatic dialogue \* look at how discourse analysis and pragmatic theories can be used to help us understand characterization in dialogue \* consider some of the cognitive patterns underlying dramatic discourse \* focus on the notion of speech as action. there is also a chapter on how to analyse an extract from a play and write up an assignment.
