Programming. Thursday, 3 October 2013.  
unit 14 M1. Explain how an operating  
system can be viewed as an event driven  
application. There are many ways that an  
operating system could be referred to as an  
event driven application. The first thing  
that there is on an operating system that is

# Read Book Unit 14 Event Driven Programming

event driven is the fact that the start button at the bottom of the desktop is activated through a click event.

## **Unit 14 - Event Driven Programming: unit 14 M1**

Visual basic is an event driven programming language which allows you

# Read Book Unit 14 Event Driven Programming

to code using premade blocks of code.

Visual basic allows you to put buttons on screen and other event driven programming objects e.g. list boxes, pictures, text boxes etc. visual basic is a simple to use programming language which can makes a lot of different events happen.
