Voice projection is the strength of
speaking or singing whereby the
voice is used loudly and clearly. It
is a technique which can be

Access Free Voice Production In Singing And

employed to demand respect and attention, such as when a teacher is talking to the class, or simply to be heard clearly, as an actor in a theatre. Breath technique is essential for proper voice projection.

A further distinction between
singing and speaking is the
control that is required, in
singing, of the movement and
reflexes of the larynx. As one

Access Free Voice Production In Singing And

sings higher, the larynx tends to rise sympathetically and at a certain point becomes an interference causing the voice to break, or crack.
